July 28, 2026

Dear Hiring Manager,

I am excited to apply for the Broadcast Technician position with CBC. With more than 30 years of experience in broadcast television, live production, technical directing, and video production, I have built a career around delivering high-quality live broadcasts in fast-paced environments where precision, teamwork, and technical expertise are essential. Throughout my career, I have directed live television newscasts, operated professional production switchers, created motion graphics in Adobe After Effects, Edited in Adobe Premiere Davinci Resolve, and Avid Media Composer...and managed multi-camera productions, and collaborated closely with directors, engineers, camera operators, and production crews to ensure flawless broadcasts. I am confident that my extensive broadcast background and passion for excellence make me a strong fit for this role.

My experience spans every stage of live production, from configuring production systems and troubleshooting technical issues under pressure to managing audio/video workflows and creating compelling visual content. As a Technical Director and Production Manager for television stations and production companies, I have worked extensively with professional switching systems, signal routing, live audio, motion graphics, and broadcast operations while maintaining calm focus during live events. Although much of my hands-on experience has been with Grass Valley, Ampex, TriCaster, and Black Magic systems, my decades of technical directing have given me the adaptability to quickly learn and excel with Ross, Sony and other environments. I enjoy solving complex technical challenges, maintaining organized workflows, and supporting production teams to deliver exceptional viewing experiences.

Beyond my technical qualifications, I appreciate CBC's commitment to honor, hospitality, humility, and serving others through excellence. As someone who values collaboration, integrity, and using my talents to make a positive impact, I would welcome the opportunity to contribute my experience to your production team while supporting the mission of the church. Thank you for considering my application. I look forward to the opportunity to discuss how my broadcast experience, technical skills, and dedication to quality can contribute to CBC's live production ministry.

Sincerely,

John Carr
