Professional Summary

I'm a senior content and video production professional with 30+ years of experience developing, producing and delivering video and multimedia content across corporate, brand, broadcast, commercial and digital environments. My strength is connecting strategy to execution.

I can take a project from the initial business or communication objective through creative development, scripting, pre-production, directing, production, post-production and final delivery. I'm equally comfortable leading a production team, working directly with executives and stakeholders, or stepping in hands-on when a project requires experienced production expertise.

Earlier roles have included Production Manager, Director/Technical Director, Video Producer/Technical Coordinator and Editor/Animator, giving me experience across virtually every stage of the production lifecycle.

Skills
